

Customer Case Study

Mature Services: Helping Seniors Get Back to Work

Customer overview

Mature Services, Inc. provides community-based services to train, motivate, and empower mature job-seekers. The organization maintains active partnerships with employers, which leads to increased opportunities for mature workers.

Based in Akron, Ohio, Mature Services now has eight Mature Services' Employment & Training Solutions Centers throughout the state to provide job training. It also provides temporary and permanent job placement for seniors through its Mature Staffing Systems program.

To date, through its training and job placement services, Mature Services has provided:

- ✔ **640,774 hours** of community service in Ohio; with
- ✔ **1,131 trainees** enrolled in part-time work experience programs, which prepare them for employment.

Business situation

Mature Services needed a way to assess the ability levels of individuals enrolling in its training programs. The organization decided to use **online assessments**, to help mature job-seekers overcome the difficulties they had encountered in taking online standardized tests when they applied for work. In addition, many of the critical skills seniors needed to develop were computer-based.

Solution

When Mature Services looked for an online assessment company, they chose **eSkill**, because they found that it provided the most **flexibility in creating their own tests**, and offered a much **wider range of subject areas** than other online testing companies, as well as flexibility in distribution and reporting tools.

For the past four years, Mature Services has used eSkill online assessments to observe and measure job-seekers' comfort levels with using a computer, as well as their skill levels for specific fields of employment.

Mature Services has used eSkill's extensive database of question to create assessments in the following skill areas, among others.

- ✔ **Math**
- ✔ **Language**
- ✔ **Microsoft programs**
- ✔ **Graphic design**
- ✔ **Custom content specific to job opportunities**

The organization is currently putting together a Customer Service/Call Center program, to use when the next training session starts.

“ Using eSkill assessments results in a more effective screening for skill level, and that allows us to tailor future training more accurately to the needs of the individual.

It enhances the overall training environment to have a neutral tool that shows a participant where they are in terms of skill level. Sometimes people who have been out of work for a long time, or who are beginning in a new career area, find it hard to believe they actually are growing in ability. They tend to distrust verbal praise, but the test scores are impersonal, and therefore more believable. Other times they are convinced that their skill level is higher than it actually is, and a testing tool like this can help them realize where they are weak and encourage them to get the needed training.

And the people we have dealt with at eSkill have always been helpful when we had a challenge.

”

Kathleen McLaughlin,
Marketing and Communications Manager,
Mature Services

Results and benefits

Individuals who take the eSkill assessments before and after specific Mature Services training programs experience a boost in confidence when they see their improved scores, and this carries through in their willingness and success in future training.

Overall, eSkill offers the necessary tools for Mature Services to develop a specialized learning environment for senior job seekers to improve their skills and be more comfortable in job interview situations. This, in turn, means that they've been more successful in gaining employment in the following fields.

- ✔ **Front Desk**
- ✔ **Call Center**
- ✔ **Customer Service**
- ✔ **Retail**
- ✔ **Accounts Payable and Receivable**
- ✔ **and many more**

To meet funding requirements, Mature Services needed to manage the test centers for each of its eight training facilities separately.

Using **eSkill's multi-location subscription**, the organization has benefitted from reduced costs overall, while maintaining each center's independence.

About eSkill

From pre-employment testing to skills gap testing, eSkill's services are *easy-to-use*, *low-risk*, and *feature competitive pricing plans* so any company can assess as many prospects - and present employees - as needed.
